

Okay, well listen, I want to, I want to mention to everybody that right now I am having problems with the past director and staff of the International Leonard Peltier Defense Committee [ILPDC] . They are no longer authorized to raise funds in my name. I started the Ad Hoc committee which is to do all of the organizing and fundraising and everything. They [the ILPDC] are not being ....accountable, they are raising money and they're not accountable! We don't know what they are spending it on, and right now I am probably going to have to take them to court to get that committee back, but until we officially make an announcement that we have it under control again, please don't donate...money to them. But you can donate to the Ad Hoc committee because I had lawyers obtain [ I have obtained lawyers] and I need that. That's where the funds are going [from the Ad Hoc Committee] and we are exposing the case to a level that no one....has heard about...but we know in the Indian World, these are the type of trials that we have always had and we have a lot of evidence and officials that were involved in this who have come forward, whistle blowers, and... everything I've said for 47 years.....they've got evidence that everything we said is accurate. Thank You.
